

Risk Advisory snapshot

The management of any sporting entity involves responsibilities and obligations. The nature of the sport of golf means that risk areas are broader. Injuries to participants, legal liabilities of clubs and loss of financial funding and sponsorship are all examples of risk areas.

Together with our risk advisory consultants, Podium Risk Advisory, and our insurance partner, Sportscover, we will regularly provide snapshots aimed at increasing your awareness to risk assisting you to establish the correct culture and practices to enable compliance with your responsibilities and obligations and thus reduce risk and potential for loss.

Remember, Insurance is the most common method of risk management, however it should not be seen as a risk management tool; rather it is a compensation for risk.

Our first Risk Snapshot discusses medical emergencies on Golf Courses. Go to www.australiangolfinsurance.com to read.
